

# WISCONSIN MASTER GARDENERS IN DANE COUNTY

*In 2018, Dane County Master Gardener Volunteers reported 13,100 hours of community service, worth a value of over \$314,400.\**

\*Using the current estimated dollar value of volunteer time in Wisconsin of \$24.69 per hour from Independent Sector (independentsector.org).

## FEATURED PROJECTS

### Answering garden questions at farmers' markets

MGVs who have received an extra level of training from Dane County Extension to answer gardening questions from the public are stationed at 6 community farmers' markets in Madison, Monona, Sun Prairie and Fitchburg in Dane County from May through September to provide information to the gardening public and to raise the visibility of the program so more people become aware of it as a resource for education. MGVs report that many people become "repeat clients", returning to tell MGVs of the progress of their plants over the season and ask additional questions. The program has grown in scope since it was inaugurated in 2012. In 2017, 1,175 residents were served, and 1,140 county residents were served in 2016.

In addition MGVs worked with community members to plant a pollinator garden at the site and installed signs to educate over 16,000 visitors annually about the pollinators and the garden's function.

### Dane County Extension teaching garden

MGVs plan and maintain the Dane County Extension Teaching Garden, which provides an array of trees, shrubs, perennials and annuals labeled with print as well as QR codes accessible by smartphone that are linked to a blog ([tgplpinfo.blogspot.com](http://tgplpinfo.blogspot.com)) with more information on each plant. It is the only public garden in the area using this technology. The garden is used as an outdoor classroom with hands-on training for MGVs, public education and youth gardening. This year, a ribbon-cutting ceremony celebrated new interpretative signs. Eighty-seven attendees including the County Executive, County Board Supervisors, MGVs and Dane County Extension staff attended.

### Program promotion

As part of a five-year strategic plan, MGVs created a signature project to promote community awareness of the Master Gardener Program and provide a public service. A team volunteered throughout the summer and fall to restore 6 acres of prairie at the Dane County Parks Lussier Family Heritage Center. This summer, MGVs planted over 900 native plants and seeded others.
